Unmatched time & cost savings

- ONE cable—any number of zones
- Install water piping and sprinklers
- Wire in one or more “EasySwitches” to the single cable.
- Connect irrigation solenoids and/or 12 volt LED garden lights anywhere anytime along the cable.
- The EasyController can be plugged in and running in 10 minutes

The EasyController can also be used for web browsing and emails.

Developed in Australia with Federal Government R & D support utilising proven technology now in over 36 million control devices worldwide.

Many features including...

- ◆ Control one or many areas. No additional controller hardware.
- ◆ Durations can be set in days/hours/minutes/seconds.
- ◆ Turn On/Off at anytime, anywhere with just one click.
- ◆ Optional connection to the web for anywhere anytime remote control.
- ◆ Simple or advanced schedules:-
 - ◇ On/Off times using duration, local time or use your local sunrise/sunset/solar noon e.g. Water the lawn at sunrise. Turn on the driveway lights at sunset and off at 10pm every day except off at 11pm on Saturdays.
 - ◇ Set up a “Series” to turn on two or more areas one after the other. Large lawns need several watering areas.
 - ◇ “Group” control of several zones all simultaneously. e.g. Turn lights on in both the driveway and in the BBQ areas.
 - ◇ “Wet & Wait” - Optional eco smart watering with an on/off cycle allowing time for water to soak in and avoid expensive wasteful runoff.
- ◆ Automatically control pumps, purge and diverter valves wherever required.
